

## uPrizm TWL Series

**WIRELESS ETHERNET MODEMS**

The Prizm TWL series was developed to provide a high power, non-standard frequency solution for products in military and law enforcement environments.

- **Fully Transparent Wireless Link**
- **802.11b Compliant**
- **High Power Options up to +20db**
- **Designed for Operation in Harsh Environments (0° to +70° C)**
- **Custom Frequencies Available**

### **Compact**

The PRIZM TWL series is available in standard PCMCIA III package.

### **Options**

Multiplexed or stand alone versions support Omni or High Gain Yagi antennas. Custom configurations and designs available upon request.

### **Flexible**

The TWL series supports standard unlicensed ISM frequencies (900 MHz, 2.4 GHz & 5.7 GHz). These products are designed to support custom frequencies and higher output power.

### **24/7 Customer Service**

PRIZM provides 24/7 customer support via our Service Hotline. Call 1-410-925-1247.
