

IEL-BX-XP Series Explosion Proof Electrical Slip Ring

We have attained explosion proof certification from CSA International for the housings of two of our standard electrical slip ring series, the IEL-BX and IEL-OE.

Certification: Hazardous Locations Class I, Division 1, Groups C and D

The electrical specifications and most of the options available on the standard series are available on the explosion proof version. The housing is the primary component modified for the certification. This increases the total outside diameter and length of the complete assembly (compared to the standard non-certified line).

Mechanical

Specifications

Operating Current	7.5 amps per ring
Operating Voltage	1,000 VRMS
Electrical Noise	5 microV, P-P, BW = 10Hz - 10kHz at 8.5 mA, 500 rpm
Leakage Resistance	10,000 Mega ohms
Encasement	Passivated stainless steel, splash proof construction, certified for use in hazardous locations Class I, Division 1, Groups C and D
Ring Material	☐ Solid coin silver
Brush Springs	Beryllium copper
Brush Contacts	Four 80% silver - 20% graphite contacts per ring
Brush Case	Two piece, creep path grooved
Insulation	Teflon and delrin
Sealing	O-rings, double shaft seal
Wire Leads	NPT entries provided, wire lengths to your specs
Wire Exits	On axis or 90 degree

Options

Current	Up to 20 amps per ring
Voltage	Up to 6,000 VDC
Bandwidth	DC to 250 MHz
- Coax, twisted pair, or thermocouple wire	
- Oil filled
